1. OSTSen-B055 Overview

OSTSen-B055 is a 9-axis absolute orientation sensing module, which is based on BOSCH Sensortec BNO055. The BNO055 is a System in Package(SiP), integrating a triaxial 14-bit accelerometer, a triaxial 16-bit gyroscope with a range of ± 2000 degrees per second, triaxial geomagnetic sensor and a 32 bit cortex M0+ microcontroller running Bosch Sensortec sensor fusion software, in a single package.

The corresponding chip-sets are integrated into one single 28-pin LGA 3.8mm x 5.2mm x 1.1mm housing. For optimum system integration the BNO055 is equipped to run with HID-I2C protocol running the BNO055 into a plug-and-play sensor hub solution for devices running the Windows 8.0 or 8.1 operation system.
