## Stacking Connector

*G:35,30, 25, 45, 40

## Features

## 1. Compliant with DIN Standard

Comply with IEC603-2/DIN41612 standard.

## 2. Variation in number of contacts

$10,16,20,24,28,30,32,44,48,50,64,90,96,100,128$, and 144 contacts are available.

## 3. Two point contact construction

PCN10 and 12 series are constructed with high reliable doublesided two point contacts.
PCN13 series pursues after cost performance, and constructed with single sided two point contacts.

## 4. Broad applications

DIN standard types of B, C, R, and Q are available. The flux tight product is available. The easy lock pin type to prefix the board is available.

## 5. Stacking height variation

PCN10H series contains 25, 30, 35, 40 and 45 mm stacking height.
6. Circuit protection function available

PCN10MC series utilizes a sequence structure for circuit protection function.

## 7. Cable connector

ID connector for ribbon cable is available.
The connector is prepared for crimping connection for AWC\#26 to 30 cables.

## Application

Control equipment, exchange, measuring instruments etc.

Double-sided two point Contact System

Single-sided two point Contact System

| 7.Durability (Mating/un-mating) | Contact resistance : 20m ohms max. |  | 500 cycles |  |
| 8.Resistance to Soldering heat | No deformation of components affecting performance. |  | Manual soldering: $300^{\circ} \mathrm{C}$ for 3 seconds |  |

Note 1: Includes temperature rise caused by current flow.
Note 2: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non conducting condition of installed connectors in storage, shipment or during transportation.

## DIN Connector Mating Condition

DIN connectors of Hirose should be used under conditions as illustrated below.

According to the inter-combination with DIN standard type C (type B) and type R (type Q ), the contact numbers and row numbers represent contact No. (No. 1 to 32) and row No. (a, b, c).
-DIN standard type $C$ and type $R$ represent the 3 -row 96 contacts type, including 32 contacts in single-row. -DIN standard type B and type Q represent the 2-row 64 contacts type, including 32 contacts in single-row.
